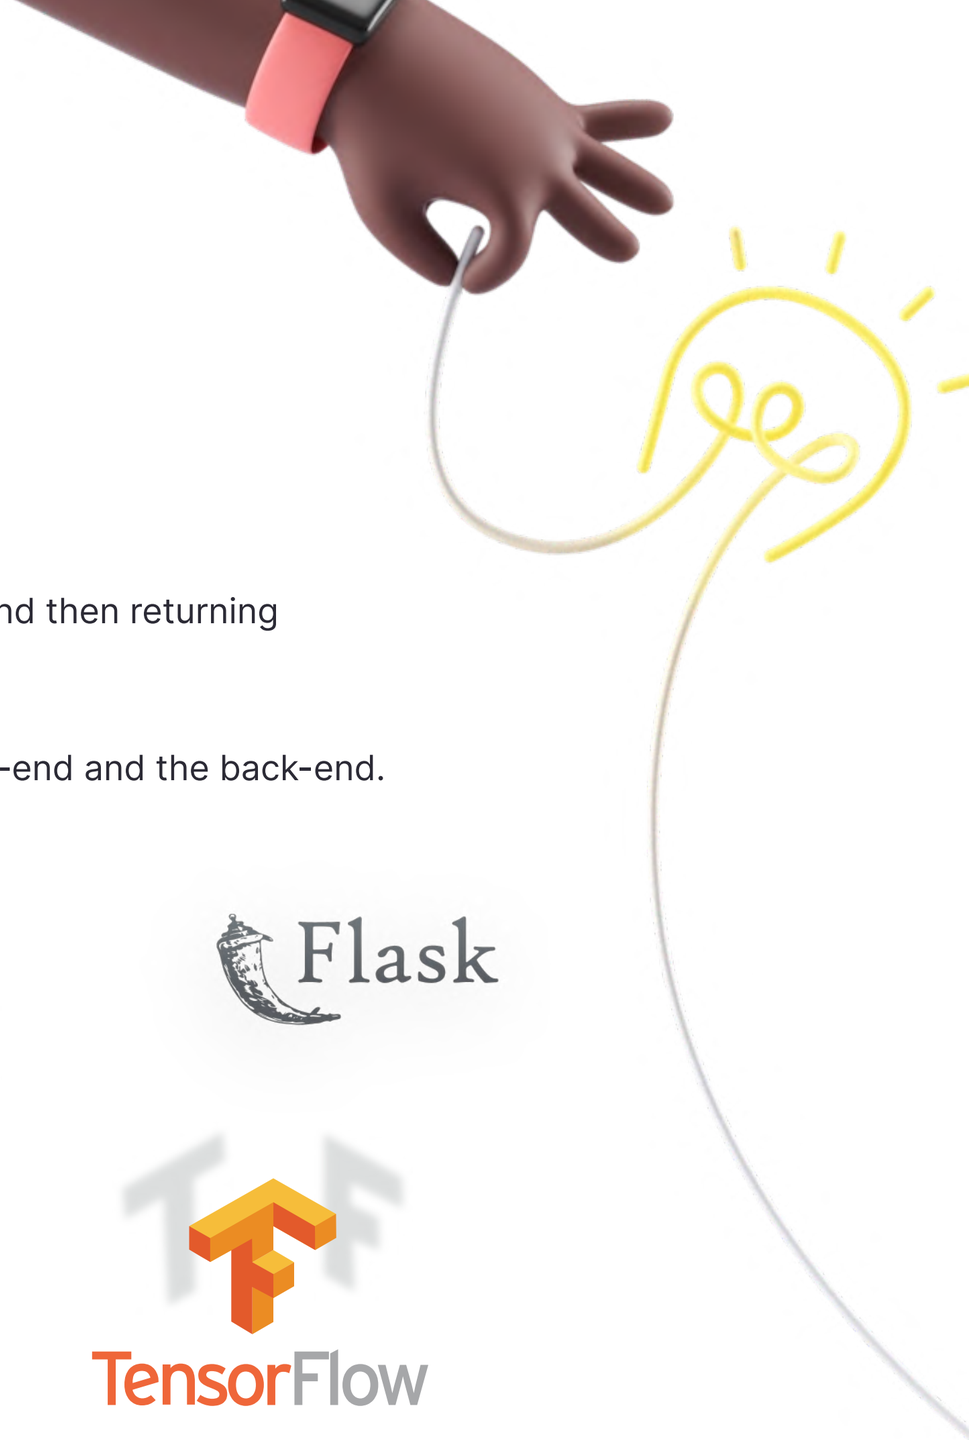
The **TECH STACKS** we are using for achieving the desired outcome are as follows:-



- **Next.js** for the front-end.
- **Tailwind** for the styling of components.
- **Spline 3d** for the interactive 3d stuff on the home page.
- Web scraping is done using python with the help of libraries like **BeautifulSoup** and **Scrapy**.
- An **API** is set up using **Flask** in the back-end for receiving the requests from the front-end and then returning scraped data back to the front-end in **JSON** format.
- **Axios** is used for simplifying the process of transfer of requests and data between the front-end and the back-end.
- An **AI powered** bot based on **TensorFlow** and **NLTK** for resolving user's queries.
- **Google Firebase** is used for storing the data.
